* Bond Debt reamortization completed Aug 18, 2023. This reduced the monthly debt payment for the next 40 months - through Dec 2026. It also changed the calculation of DCOH, by allowing us to include Restricted Bond Debt Reserve Cash as well as Retricted for Capital Improvement Fund and changed the average expenses per day used to calculate DCOH from 12 month avg, to a 3 month avg.

** MAD=Maximum Annual Bond Debt

*** Debt Service Ratio = Net Operating Revenue + add back Deprec & Int, +Gain/Losses on Investments = Net Revenues Available for Debt Service
Bond Prin & Int Due next 12 months, Capital Int & Prin Due 1 year = MAD

**** DCOH = Days Cash on Hand (Based on 12 months average of Operating Expenses / Does not include Bond Debt Reserve Cash \$1.8 M)
